NEW DURAPLAY® TENNIS KITS ARE AVAILABLE

Dalton, GA – Challenger Industries launches a new DURAPLAY® Tennis Synthetic Turf that is designed to provide a regulation size tennis court in a kit. DURAPLAY® tennis court kits can be used over any sound base, including an existing court, concrete, asphalt, or a crushed stone base. DURAPLAY® tennis courts will provide years of enjoyment and offer a playing surface that is less damaging to knees and ankles than traditional hard courts.

DURAPLAY® tennis courts are available in sport green or clay colors and include all of the lines. All of the markings are permanent and are tufted into the turf (no markings are painted on the turf). Each kit comes with four different types of rolls that will fit together to form a complete, regulation size tennis court. In order to provide a solid, yet softer playing surface, DURAPLAY® tennis courts should be in-filled with rounded silica sand.

For more information, contact Challenger Industries by calling 1-800-334-TURF (8873) or by emailing info@challengerind.com.
